

Launch of *Exploring geoscience: Activities and questions* online book

We are pleased to announce the online publication of the new companion book to *Exploring geoscience across the world* – our new *Activities and questions* book.

Exploring geoscience across the globe textbook, available online at:

<http://www.igeosci.org/teaching-resources/geoscience-text-books/> or
<http://www.igeosci.org/wp-content/uploads/2020/09/Exploring-geoscience-Sept2020.pdf>

New

Activities and questions book, available online at:

<http://www.igeosci.org/teaching-resources/geoscience-text-books/> or
<http://www.igeosci.org/wp-content/uploads/2020/11/Exploring-geoscience-activities-and-questions.pdf>

New

Activities and questions: some answers book available by emailing

chris@earthlearningidea.com

Like *Exploring geoscience* our *Activities and questions* book is free to download at:

<http://www.igeosci.org/teaching-resources/geoscience-text-books/>. It is keyed into the chapter and section headings of the *Exploring geoscience* book and contains online links to more than 300 geoscience teaching activities together with more than 300 questions to consolidate pupil understanding. The questions range from those which can be answered by careful reading of the *Exploring geoscience* textbook to deep questions that require deep and creative thinking.

Also published on a hidden part of the International Geoscience Education Organisation (IGEO) website is the *Activities and questions: some answers* book, with answers to and discussions about the questions. To avoid pupils across the world being able to access these answers, please email chris@earthlearningidea.com to show you are a legitimate teacher, educator or other interested person by sending:

- your CV;
- an email note to say that you will not allow your own or any other pupils have access to the *Some answers* book.

Chris will then be very happy to send you the access details for the *Some answers* book.

With the International Geoscience syllabus published on the IGEO website, the *Exploring geoscience across the world* textbook to support the syllabus, and the new *Activities and questions* book with the accompanying *Some answers* book, teachers and educators across the world have access to

world class geoscience knowledge, understanding and teaching materials, approved by the International Geoscience Education Organisation (IGEO), the International Union of Geological Sciences (IUGS) and the European Geoscience Union (EGU). Let us all now use these to educate the world for geoscience.
